

Biography: Robotwon

As DJ, producer and co-founder of Live-in Music, Robotwon has immersed himself in developing and promoting his telectro sound, a blend of Nu-Disco, Hard Electro, Techno and Rock. Currently he holds down residencies with London nights Under the Stairs and FFaction and has regularly played at institutions such as 333, The Key , Hidden, The Cross, Medicine Bar, the Bomb and Stealth playing alongside the likes of Phil Kieran, Chris Fink, Hyper, Shitdisco, Trash Fashion and Justin Robertson. The past 12 months has seen R1 playing internationally in Russia and Amsterdam and as summer sets in dates, both DJ and Live, are already booked up for Matter, The Lightbox and Cable.

Playing a cut up hard electro, techno and rock and roll his sets involve 2 x CDJ, 2 x Decks enabling the layering and splicing of multiple tracks into truly unique audio goodness. In combination with It's Real! Robotwon also performs a full AV set and is currently building a 18ft interactive robot installation/stage for the festival season.

The next few months sees Robotwon push forward with a hectic release schedule which started back in July 2008 with 'Sabre' a twisting telectro monster that gained radio support and caused serious damage on the dance floor. This was followed up with Sure Thing and Clean Trigger released on Live-in Music. He will also be releasing his debut artist album at the end of this year. Alongside his own material, Robotwon has been doing remix work for both Live-in Music and 1980 Recordings including re-cuts for People Get Real, GTRONIC and the Peacocks.
